Category:	Cat. #	Product Name:
Polyclonal Antibodies	1107NF- C34	**IgG (H+L)**

Description:
Goat Anti-Human IgG (H+L specific)

Presentation:
ANTIBODY PRESENTATION: neat serum.PRESERVATIVE USED: 0.05% Sodium Azide.

Aliquoting Instructions:
Do not dilute the entire reconstituted solution at once. Withdraw aliquots as needed with a micropipette and keep concentrated stock at 4°C. Dilute according to the particular application being used. In general, the 0.05M borate pH 8.0 containing 0.15M sodium chloride, 0.02% sodium azide, is a good dilutent to use with most antibodies. When diluting for immunohistochemistry, ELISA or western blot, make the dilution in Antibody Diluting Buffer. Avoid diluting the entire contents of the vial at once since the diluted solution may have reduced stability.

Storage:
Refrigerate at 4°C. Do not freeze.

Notes:
ANTIBODY CHARACTERISTICS:
This antibody was prepared in goat using a highly purified human IgG. This antibody has some cross-reactivity against rabbit IgG.

Size: 0.1 mg
Host: Goat
Form: Concentrated
Units On Hand: YES

For Research Use Only
