

Anti-AGGF1(Angiogenic factor with G patch and FHA domains 1) Polyclonal Antibody

Cat. #: 60B502

Description:

AGGF1(Angiogenic factor with G patch and FHA domains 1)promotes angiogenesis and the proliferation of endothelial cells. It is able to bind to endothelial cells and promote cell proliferation, suggesting that it may act in an autocrine fashion. AGGF1 interacts with the secreted angiogenic factor TNFSF12.

Species: mouse

Storage and Stability: at -20oC

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to C-terminal residues of mouse AGGF1 (Angiogenic factor with G patch and FHA domains 1)

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.
