

Anti-HIF1AN (Hypoxia-inducible factor 1 alpha inhibitor)

Cat. #: 60B307

Description:

The HIF1AN (Hypoxia-inducible factor 1 alpha inhibitor) hydroxylates HIF-1 alpha at Asp-803 in the C-terminal transactivation domain (CAD). It functions as an oxygen sensor and, under normoxic conditions, the hydroxylation prevents interaction of HIF-1 with transcriptional coactivators including Cbp/p300-interacting transactivator. The HIF1AN is involved in transcriptional repression through interaction with HIF1A, VHL and histone deacetylases.

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to Middle residues of human HIF1AN (Hypoxia-inducible factor 1 alpha inhibitor)

Clone Number:

Isotype:

Species: Human, Mouse

Storage and Stability: at -20°C

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.

Applications :

ELISA

Western Blotting (1 µg/ml for 2hrs)
