

Anti-NovH (Nephroblastoma overexpressed gene protein homolog) Polyclonal Antibody

Cat. #: 60B125

Description:

The human NOV protein homolog (NovH) (Nephroblastoma overexpressed gene protein homolog) is likely to play a role in cell growth regulation. It interacts with FBLN1. The protein shows an increased expression in WILMS tumor of the stromal type. It likely belongs to the CCN family and contains IGFBP, VWFC TSP type-1 and C-terminal cystine knot-like (CTCK) domain.

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to C-terminal residues of human NOV protein homolog precursor (NovH) (Nephroblastoma overexpressed gene protein homolog)

Clone Number:

Isotype:

Species: human

Storage and Stability: at -20°C

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.

Applications :

ELISA

Western Blotting (1 µg/ml for 2hrs)
