

Anti-P90(p90 autoantigen) Polyclonal Antibody

Cat. #: 60B352

Description:

The p90 autoantigen is localized to the cytoplasm in cultured cells and mouse fetal, but not adult liver. The auto-antibodies to a 90 kDa protein (p90) were found associated with anti-p62 responses in the same hepatocellular carcinoma (HCC) patient group. The autoantibodies to p90 were also detected in prostate cancer, gastric cancer patients. The auto-antibody production in cancer may be directly linked to aberrant auto-antigen expression.

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to C-terminal residues of human p90 autoantigen

Clone Number:

Isotype:

Species: Human

Storage and Stability: at -20oC

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.

Applications :

ELISA

Western Blotting (1µg/ml for 2hrs)
