

## Anti-TMED4 (Transmembrane emp24 domain containing protein 4) Polyclonal Antibody

Cat. #: 60C044

### Description:

TMED4(Transmembrane emp24 domain containing protein 4) is a Type I membrane protein. It's localized in endoplasmic reticulum.

TMED4 belongs to the EMP24/GP25L family and contains 1 GOLD domain.

Clone Number:

Isotype:

Species: human, mouse

Storage and Stability: at -20oC

### Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to N-terminal residues of human TMED4(Transmembrane emp24 domain containing protein 4 precursor)

### Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

### Preparation:

Purified by antigen-specific affinity chromatography.

### References

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to residues 170-184 of human TMED4(Transmembrane emp24 domain containing protein 4 precursor)

### Applications :

ELISA

Western Blotting (1µg/ml for 2hrs)
