

## Anti-TOM1L1(TOM1-like 1 protein) Polyclonal Antibody

Cat. #: 60B586

### Description:

The TOM1L1 (TOM1-like 1 protein) is probable adapter protein involved in signaling pathways. The protein interacts with the SH2 and SH3 domains of various signaling proteins when it is phosphorylated. It may promotes FYN activation, possibly by disrupting intramolecular SH3-dependent interactions. It also interacts with FYN, GRB2 and PIK3R1 when phosphorylated.

### Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to C-terminal residues of human TOM1L1 (TOM1-like 1 protein).

Clone Number:

Isotype:

Species: Human

Storage and Stability: at -20°C

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.

Applications :

ELISA

Western Blotting (1 µg/ml for 2 hrs)
