Mouse Monoclonal Antibody Cyclin D1 conjugated to Sepharose Beads

CatalogNo: ANT8149-M

Size 200ul

Storage Store at 4 °C for frequent use

Description

This Antagene antibody is immobilized by the covalent reaction of hydrazinonicotinamide-modified antibody with formylbenzamide-modified beads. It is useful for immunoprecipitation.

Cyclin D1 (ANT0038R) Rabbit mAb

Formulation: Each vial contains 1mg/ml Magnetic Bead in PBS, pH 7.2, 0.05mg ANaN3.

Host Species Reactivity Applications

• Rabbit • Human, Mouse, Rat, • WB, IHC, IF, IP, ELISA

MW Isotype

• 34kD (Calculated) • IgG, Kappa 36kD (Observed)

Recommended Dilution Ratios

IP

Basic Information

Clonality Monoclonal

Clone Number ANT0038R

Immunogen Information Specificity

Endogenous

Gene name CCND1

Protein Name G1/S-specific cyclin-D1

Organism	Gene ID	UniProt ID
Human	<u>595</u> ;	<u>P24385</u> ;
Mouse	<u>12443</u> ;	<u>P25322;</u>
Rat	<u>58919</u> ;	<u>P39948</u> ;

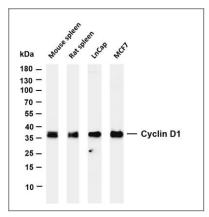

Cellular Localization **Nucleus**

Tissue specificity Brain, Placenta, Tongue,

Function

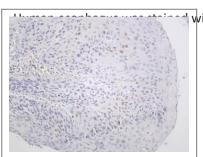

Disease: A chromosomal aberration involving CCND1 may be a cause of B-lymphocytic malignancy, particularly mantle-cell lymphoma (MCL). Translocation t(11;14)(q13;q32) with immunoglobulin gene regions. Activation of CCND1 may be oncogenic by directly altering progression through the cell cycle., Disease: A chromosomal aberration involving CCND1 may be a cause of multiple myeloma [MIM:254500]. Translocation t(11;14)(q13;q32) with the IgH locus., Disease: A chromosomal aberration involving CCND1 may be a cause of parathyroid adenomas [MIM:168461]. Translocation t(11;11)(q13;p15) with the parathyroid hormone (ANTH) enhancer., Function: Essential for the control of the cell cycle at the G1/S (start) transition., online information: The Singapore human mutation and polymorphism database, PTM: Following DNA damage it is ubiquitinated by some SCF (SKP1-cullin-F-box) protein ligase complex containing FBXO31. Ubiquitination leads to its degradation and G1 arrest., PTM: Phosphorylation at Thr-286 by MAP kinases is required for ubiquitination and degradation following DNA damage. It probably plays an essential role for recognition by the FBXO31 component of SCF (SKP1-cullin-F-box) protein ligase complex., similarity: Belongs to the cyclin family., similarity: Belongs to the cyclin family. Cyclin D subfamily., subunit: Interacts with the CDK4 and CDK6 protein kinases to form a serine/threonine kinase holoenzyme complex. The cyclin subunit imparts substrate specificity to the complex.,

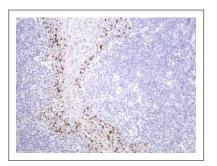

| Validation Data

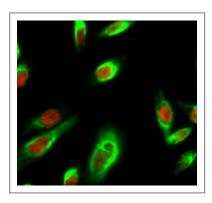

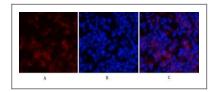

Various whole cell lysates were separated by 4-20% SDS-PAGE, and the membrane was blotted with anti-Cyclin D1 (ANT0038R) antibody. The HRPconjugated Goat anti-Rabbit IgG(H + L) antibody was used to detect the antibody. Lane 1: Mosue spleen Lane 2: Rat spleen Lane 3: LnCap Lane 4: MCF7 Predicted band size: 34kDa Observed band size: 36kDa
