

Category:
Polyclonal Antibodies

Cat. #
1107NF-109M

Product Name:
Antichymotrypsin, Alpha-1 - Prediluted

Description:
Polyclonal Rabbit Anti-Human Alpha-1-Antichymotrypsin

Immunogen:
Alpha-1-antichymotrypsin purified from human serum.

Application:
This antibody is prediluted for Immunohistochemistry use.

Species Reactivity:
Human. Does not react with Bovine, Equine, Porcine, goat, sheep, Guinea Pig, Rat or Mouse tissues.

Recommended Positive Control:
Formalin- or B5-fixed Tonsil, Colon, Skin

Presentation:
Whole rabbit serum prediluted in Primary Antibody Diluting Buffer pH 7.6.

Aliquoting Instructions:
Not applicable

Staining Procedure:
The prediluted antibody can be used on frozen cryostat sections as well as formalin-fixed paraffin-embedded tissue sections. For paraffinembedded tissue sections, we recommend an incubation time and temperature of 30 minutes at 37°C for this antibody, when used in conjunction with an immunoperoxidase staining kit.
*Prolonged fixation in buffered formalin can destroy the epitope.

Specificity:
This antibody reacts with the 62 kD human alpha-1-antichymotrypsin.

Storage:
Refrigerate at 4°C. Do not freeze.

Size: 5 ml
Host: Rabbit
Form: Prediluted
Concentration: .005 mg/ml
Units On Hand: YES
