

Category:
Polyclonal Antibodies

Cat. #
1107NF-205M

Product Name:
Ferritin - Prediluted

Description:
Polyclonal Antibody to Ferritin

Immunogen:
Human ferritin with human serum.

Application:
This antibody is prediluted for Immunohistochemistry use.

Recommended Positive Control:
Liver

Presentation:
Purified immunoglobulin fraction of rabbit antiserum diluted in Primary Antibody Diluting Buffer pH 7.6.

Aliquoting Instructions:
Not applicable

Staining Procedure:
The prediluted antibody can be used on frozen cryostat sections as well as formalin-fixed paraffin-embedded tissue sections. For paraffinembedded tissue sections, we recommend an incubation time and temperature of 30 minutes at 37°C for this antibody, when used in conjunction with an immunoperoxidase staining kit.
*Prolonged fixation in buffered formalin can destroy the epitope.

Specificity:
This antibody reacts with human ferritin and recognizes ferritin in tissue sections.

Storage:
Refrigerate at 4°C. Do not freeze.

Notes:
The antibody can be used for the staining of ferritin in tissue sections.

Size: 5 ml
Host: Rabbit
Form: Prediluted
Units On Hand: YES

For Research Use Only
