

Category:
Polyclonal Antibodies
Prediluted

Cat. #
1107NF-209M

Product Name:
Polyclonal Rabbit Anti-Glial Fibrillary Acidic Protein (GFAP) –

Description:
Polyclonal Rabbit Anti-Glial Fibrillary Acidic Protein (GFAP)

Immunogen:
Bovine spinal cord.

Application:
This antibody is prediluted for Immunohistochemistry use.

Species Reactivity:
Human, Bovine, Mouse, Rat, Guinea Pig, Goat, and Sheep. Others not tested.

Recommended Positive Control:
Glioma, Brain

Presentation:
Polyclonal antibody prediluted in Primary Antibody Diluting Buffer pH 7.5.

Aliquoting Instructions:
Not applicable

Staining Procedure:
The prediluted antibody can be used on frozen cryostat sections as well as formalin-fixed paraffin-embedded tissue sections. For paraffinembedded tissue sections, we recommend an incubation time and temperature of 30 minutes at 37°C for this antibody, when used in conjunction with an immunoperoxidase staining kit.
*Prolonged fixation in buffered formalin can destroy the epitope.

Specificity:
This antibody reacts strongly with human GFAP.

Storage:
Refrigerate at 4°C. Do not freeze.

Size: 5 ml
Host: Rabbit
Form: Prediluted
Concentration: .04-.05 mg/ml
Units On Hand: YES
