

Anti-KLF1
(Erythroid krueppel-like transcription factor)
(Erythroid transcription factor) Polyclonal Antibody

Cat. #: 60B301

.....

Description:

KLF1 (Erythroid krueppel-like transcription factor) (Erythroid transcription factor) binds to the CACCC BOX in the beta-globin gene promoter and activates transcription. It probably serves as a general switch factor for erythroid development. It belongs to the krueppel family of C2H2-type Zinc-finger proteins.

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to C-terminal residues of mouse KLF1 (Erythroid krueppel-like transcription factor) (Erythroid transcription factor)

Species: mouse

Storage and Stability: at -20°C

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.

Applications :

ELISA

Western Blotting (1 µg/ml for 2hrs)
