

Anti-HAVcr-1(Hepatitis A virus cellular receptor 1 homolog) Polyclonal Antibody

Cat. #: 60B656

Description:

HAVcr-1 (Hepatitis A virus cellular receptor 1 homolog) may play a role in the T-helper cell development and regulation of asthma and allergic diseases.

HAVcr-1 (Hepatitis A virus cellular receptor 1 homolog) is a receptor for TIMD4 and it contains 1 Ig-like V-type (immunoglobulin-like) domain.

Species: Rat

Storage and Stability: at -20°C

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to N-terminal residues of rat HAVcr-1 (Hepatitis A virus cellular receptor 1 homolog precursor)

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.
