

Anti-ITGA5(Integrin alpha-5) Polyclonal Antibody

Cat. #: 60B695

.....

Description:

The ITGA5(Integrin alpha-5) is a receptor for fibronectin and fibrinogen. It recognizes the sequence R-G-D in its ligands. The protein contains the heterodimer of an alpha and a beta subunit. The alpha subunit is composed of an heavy and a light chain linked by a disulfide bond. Alpha-5 associates with beta-1.

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to C-terminal residues of human ITGA5(Integrin alpha-5 precursor)

Clone Number:

Isotype:

Species: human, mouse

Storage and Stability: at -20oC

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.

Applications :

ELISA

Western Blotting (1 μ g/ml for 2hrs)
