

Anti-Phospho-Rec8L1 (Meiotic recombination protein REC8-like 1) Polyclonal Antibody

Cat. #: 60C042 Phospho

Description:

Rec8L1 (Meiotic recombination protein REC8-like 1) is a meiotic recombination and sister chromatid cohesion phosphoprotein of the Rad21p family conserved from fission yeast to humans. Rec8L1 is localized in nuclear and along chromosome axis, but not chromosome ends. Rec8L1 may contribute to sister chromatid cohesion.

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic phospho-peptide(phospho-serine 251) corresponding to N-terminal residues of mouse Rec8L1 (Meiotic recombination protein REC8-like 1)

Prieto,I., et al, EMBO Rep. 3 (6), 543-550 (2002)

Species: mouse, rat
Storage and Stability: at -20oC

Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

Preparation:

Purified by antigen-specific affinity chromatography.

Applications :

ELISA
Western Blotting (1µg/ml for 2hrs)
