

## Anti-APOD(Apolipoprotein D) Polyclonal Antibody

Cat. #: 60C060

### Description:

APOD(Apolipoprotein D) occurs in the macromolecular complex with lecithin-transport and binding of bilin. APOD appears to be able to transport a variety of ligands in a number of different contexts. APOD has highest levels of expression in brain, testis, virgin mammary gland and salivary gland, moderate levels in skeletal muscle, lactating mammary gland and thymus and low levels in lung and lymph node. No expression in kidney, pancreas, liver or spleen. APOD belongs to the lipocalin family.

### Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to N-terminal residues of mouse APOD(Apolipoprotein D precursor)

Seguin,D., et al, Brain Res. Mol. Brain Res. 30 (2), 242-250 (1995)  
Cofer,S. and Ross,S.R., Gene 171 (2), 261-263 (1996)

**Species:** mouse, rat, human

**Storage and Stability:** at -20oC

### Storage buffer:

This antibody is stored in PBS, 0.01% sodium azide and 50% glycerol.

### Preparation:

Purified by antigen-specific affinity chromatography.

### Applications :

ELISA

Western Blotting (1µg/ml for 2hrs)
