

Anti-GDF-15 (Growth Differentiation factor 15) Polyclonal Antibody

Category: Polyclonal Antibody

Catalog#: AB1G191

Antigen Synonym: macrophage inhibiting cytokine-1(MIC-1)

Immunogen/Specificity:

Polyclonal antibody produced in rabbits immunizing with a synthetic peptide corresponding to N-terminal residues of mouse GDF-15 (Growth Differentiation factor 15)

Description: GDF-15 (Growth Differentiation factor 15) is a transforming growth factor beta superfamily member induced following liver injury. GDF-15 is a homodimer and disulfide-linked by similarity. GDF-15 is secreted and highly expressed in liver. GDF-15 belongs to the TGF-beta family.
