

β-Catenin (Phospho-Ser33) Antibody

Cat. #: ANTY011218

Species: Human, Mouse and Rat

Quantity: 100ug

Concentration: 100ug/100ul

Storage and Stability:

Store at -20°C/1 year

Immunogen:

The antiserum was produced against synthesized phosphopeptide derived from human β-Catenin around the phosphorylation site of serine 33 (L-D-SP-G-I).

Specificity:

β-Catenin (phospho-Ser33) antibody detects endogenous levels of β-Catenin only when phosphorylated at serine 33.

Tested application: IHC

Application Notes: Rabbit IgG in phosphate buffered saline (without Mg²⁺ and Ca²⁺), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Raised In: Rabbit

Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific phosphopeptide. The antibody against non-phosphopeptide was removed by chromatography using non-phosphopeptide corresponding to the phosphorylation site.

Storage buffer: IHC: 1:50~1:100

Form: Liquid
