

Product Information Sheet

Monoclonal Anti-Protein Kinase B α , PKB α (Sephacose Bead Conjugate)

Catalogue No. MA1085-S

Lot No. 08A12

Clone: IML-26

Ig type: mouse IgG1

Size: 200 μ l

Specificity

Human, mouse, rat, chicken.

No cross reactivity with other proteins.

Recommended application

Immunoprecipitation(IP)

Immunogen

Synthetic peptide corresponding to amino acids 461-477 of human PKB α /Akt1.

Purification

Purified by the goat anti-mouse IgG affinity chromatography.

Formulation

50% slurry in PBS pH 7.2 with 0.01mg NaN₃ preservative.

Storage

Store at 4°C for frequent use.

Description:

This Antagene antibody is immobilized via covalent binding of primary amino groups to N-hydroxysuccinimide (NHS)-activated sepharose beads. It is useful for immunoprecipitation assays

BACKGROUND

PKB α also known as V-AKT murine thymoma viral oncogene homolog 1 (AKT1). AKT1 and the related AKT2 are activated by platelet-derived growth factor. The activation is rapid and specific, and is abrogated by mutations in the pleckstrin homology domain of AKT1. AKT1 gene is mapped to chromosome 14q32.3. Akt1/protein kinase B- α is critical for ischemic and VEGF-mediated angiogenesis. Akt1 regulates pathological angiogenesis, vascular maturation and permeability in vivo.
