

# Rabbit anti-Ochratoxin A

Cat. #: P9948

.....

## Description:

Ochratoxin A is a toxic fungal metabolite, which is carcinogenic and nephropathic. Affinity purified rabbit anti-ochratoxin A is developed using ochratoxin A-KLH conjugates as immunogen. The antibodies is useful for detection, identification, quantitation, and isolation of ochratoxin A.

## Immunogen/Specificity:

Ochratoxin A-KLH conjugates.

react with ochratoxin A and C, slightly cross-react with ochratoxin B, not cross-react with ochratoxin α

## Purification:

affinity purified with Ochratoxin A on agarose.

## Method of conjugation:

Reductive amination with 2/1 molar ratio of HRP/antibody.

## Applications :

ELISA.

## Formulation

250 ug/mL in acetate buffer with 0.02% NaN<sub>3</sub>  
(pH7.2)

Clone Number:

Isotype:

Storage and Stability: at -20oC, stable for up to 3 three years.
