

Product Information Sheet

Polyclonal Anti-Annexin IV

Immunogen

— 58.1KD	
 39. 8KD	
— 29KD	

Catalogue No. PA1007

Lot No. 03L01

Ig type: rabbit IgG

Size: 100µg/vial

Specificity Human, mouse, rat. No cross reactivity with other proteins.

Recommended application

Western blot Immunohistochemistry(P) Immunocytochemistry

To reorder contact us at: Antagene, Inc. Toll Free: 1(866)964-2589 email: <u>Info@antageneinc.com</u> A synthetic peptide corresponding to a sequence at the N-terminal of human Annexin IV, different from the related rat and mouse sequence by single amino acid. Purity Immunogen affinity purified. Application Western blot At 1-2µg/ml with the appropriate system to detect Annexin IV in cells and tissues. Immunohistochemistry(P) At 1-2µg/ml to detect Annexin IV in formalin fixed and paraffin embedded tissues. Digesting the sections is required. Immunocytochemistry Suitable Other applications have not been tested. Optimal dilutions should be determined by end user. Contents Each vial contains 50% glycerol, 0.9mg NaCl, 0.2mg Na₂HPO₄. Reconstitution 1.2% sodium acetate or neutral PBS. If 0.5ml of PBS is used, the antibody concentration will be 100µg/ml. Storage At -20°C for one year. After reconstitution, at 4°C for one month. It can

also be aliquotted and stored frozen at -20°C for longer time.

FOR RESEARCH USE ONLY. NOT FOR DIAGNOSTIC AND CLINICAL USE.

BACKGROUND

Annexin IV, also known as placental anticoagulant protein II, or zymogen granule membrane-associated protein, 36-KD (ZAP36), is one of the family of calcium-dependent phospholipid-binding proteins whose normal function is uncertain. Annexin IV has 45 to 59% identity with other members of the annexin family. Annexin IV gene spans 18 to 56 kb. And it is located on mouse chromosome 6 in a region of conserved synteny with human chromosome 2. Rat annexin IV is ubiquitously expressed in epithelial

tissues. Zap36 associated with zymogen granule membranes in dog and rat pancreas. Human annexin IV gene is mapped to chromosome 2p13.
