

Polyclonal Anti-Tissue inhibitor of metalloproteinase 2, TIMP2 (Sepharose Bead Conjugate)

Catalogue No. PA1076-S

Lot No. 03A01

Ig type: rabbit

IgG Size: 100µg/vial

Specificity

Human, mouse, rat.

No cross reactivity
with other proteins.

Recommended application

Immunoprecipitation(IP)

Immunogen

A peptide mapping at the C-terminal end of TIMP-2 of human origin, identical to the related rat and mouse sequence.

Purification

Immunogen affinity purified.

Formulation

50% slurry in PBS pH 7.2 with 0.01mg NaN₃ preservative.

Storage

Store at 4°C for frequent use.

Description:

This Antagene antibody is immobilized via covalent binding of primary amino groups to N-hydroxysuccinimide (NHS)-activated sepharose beads. It is useful for immunoprecipitation assays

BACKGROUND

TIMP2 gen is encoded by 5 exons spanning 83 kb of genomic DNA. TIMP2 is 83 kilobase pairs (kb) long with exon-intron splicing sites located in preserved positions among the three members of the TIMP family. The gene for tissue inhibitor of metalloproteinases-2 is localized on human chromosome arm 17q25. TIMP-2 abrogates angiogenic factor-induced endothelial cell proliferation in vitro and angiogenesis in vivo independent of MMP inhibition.
