

Product Informatiion Sheet

Polyclonal Anti-MMP16 (Magnetic Bead Conjugate)

Catalogue No. PA1123-M Immunogen

A synthetic peptide mapping at the C-terminal of human MMP16, identical to the related

Lot No. 08J01 rat sequence.

Ig type: rabbit IgG1 Purification

Immunogen affinity purified

Size: 100µg/Vial

Contents

Specificity Each vial contains 1mg/ml Magnetic Bead in PBS, pH 7.2, 0.05mg NaN₃.

Human, rat, mouse.

No cross reactivity with other Storage

proteins. Store at 4°C for frequent use.

Recommended application Description:

Immunoprecipitation(IP)

This Antagene antibody is immobilized by the covalent reaction of

hydrazinonicotinamide-modified antibody with formylbenzamide-modified magnetic

beads. It is useful for immunoprecipitation

BACKGROUND

The matrix metalloproteinase 16(MMP16) protein consists of 604 amino acids and has a characteristic MMP domain structure, which gene is mapped on human chromosome 8q21¹. Additionally, MMP16 has a C-terminal extension containing a potential transmembrane domain, similar to MMP14, MMP15, and MMP17². Furthermore, it is membrane-bound and is a member of the membrane-type MMPs that are a subclass in the MMP family since the other members lack a C-terminal transmembrane domain and are secreted as soluble forms². MMP16 is expressed as a 12-kb transcript in brain, placenta, heart, and some carcinoma cell lines, but is not detectably expressed in lung, kidney, liver, spleen, and muscle².
